

Patch Testing involves placing small amounts of the substance (Ink, Inkless Serum) against the skin and affixing it in place for 48-72 hours. The testing site is then monitored for local reaction. Potential adverse events include rash at the site, infection, or delayed skin reactions.

There is a possibility of an allergic reaction to pigments. Pigment contents Consist of: iron oxide, titanium dioxide, isopropyl alcohol, glycerin, ethanol, and distilled water. Inkless Serum Consist of: Jojoba, Camellia Seed, Vitamin E, Neroli essential, Lavender essential and Lemon Oils.

A patch test is advisable however it does not ensure a client will not have an allergic reaction.

I CONSENT TO A PATCH TEST: \_\_\_\_\_

I have received a patch test on the date below. The patch test has been received and it releases KD Kaesthetics, Keisha Davis, and assistant(s) from any liability related to any allergies or other reaction to applied tattoo/permanent makeup pigments. I have been informed that reactions can occur at any time in the future. Sun exposure can also cause a reaction with the pigments (colors).

I WAIVE THE PATCH TEST: \_\_\_\_\_

I release, KD Kaesthetics, Keisha Davis, and any and all assistant(s) from any liability if I develop an allergic reaction to the tattoo/permanent makeup pigments during or after tattoo/permanent makeup procedure(s).

I automatically release the technician and assistants from liability if I develop an allergic reaction to the pigment.
